Office Action Summary

Serial Number: 08/990195

Art Unit: 3727

In view of the newly cited references and the IDS submitted by applicant, the finality of the office action dated 12/30/98 has been withdrawn

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shackelford. Shackelford shows all the structure of the device as recited by the claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moskowitz in view of Shackelford. Shackelford shows all the structure of the device as recited by the claims

except the soil in the legs. However, Shackelford shows soil in the legs of the pot. It would have been obvious to provide legs of the container of Moskowitz with soil in order to use the container for the plants that need soil.
